1. Setting up

- On the home screen you set **one wake-up time**. The alarm repeats every day and is set for the next day automatically every time it ends.
- **Settings:**
  - EN / DE: language of the app, the voice and the notifications
  - Your name, used in the greeting
  - Voice: by default `iol` for English and `nfh` for German
  - Alarm sound: by default Soft piano + song
  - Which surprise types to include: Quiz, Song, Mini challenge, Riddle
- **Permissions:** when you open the app, it asks for "Full screen notifications" and "Display over other apps" until both are on. With both, a ringing alarm always switches to the app, even on a locked phone.

2. The alarm rings

- **Any music that is playing (Spotify, for example) is paused.**
- **Sound:** your alarm sound fades in over 10 seconds. After 20 seconds it turns into the wake-up song.
- **The app opens its ringing screen,** over the lock screen as well. It shows:
  - **Surprise me**: the alarm stops and the surprise starts.
  - **Stop without surprise**: the alarm stops. No surprise and no check-in, no feedback notification.
  - **No tap for 40 seconds**: the surprise starts by itself.
- **If only the notification shows:** → can you make the pop-up bigger?
  - **Surprise me**: opens the app over the lock screen without unlocking, and the surprise starts.
  - **Stop**: the alarm stops, and nothing else happens.
  - **Tapping the notification text** also starts the surprise, but Android may ask you to unlock first.

3. The surprise

- **The screen stays on** while the surprise is waiting for you, so it can't lock again. → the screen sometimes locks, only lock it one I am awake is clicked
- **Picking:**
  - Only the types you switched on are used.
  - The same type never comes twice in a row.
  - Every item is used once before any repeats.
  - Some challenges only fit weekdays or weekends.
- **Greeting:**
  - English: "Hello there, Jana, it's the morning… I have a surprise for you…"
  - German: "Halloooooooo Jana, es ist Zeit zum Aufstehen…"
  - Then: "Your surprise is…" followed by the surprise itself.

Song

1. The voice announces the song.
2. If the phone is locked, the voice says “Unlock your phone and the music starts” and Android shows the unlock prompt. → can you fix this so the music also plays if the phone is locked? It is very important.
3. The song plays in Spotify, and Spotify’s Autoplay continues with similar songs.
4. **After 10 minutes** the music is paused and the “Still sleeping?” check-in rings (section 4).
5. Buttons: Play again, Another one, Start my day. → remove this because spotify is open now

Quiz, riddle or mini challenge

- The voice reads it out. **Each time it has finished speaking, the waiting music plays for 30 seconds**, then the voice repeats everything.
- **Buttons while it’s waiting:**
  - **I am awake**: “Great, you’re awake!” Done, with no check-in.
  - **Play some songs**: a random feel-good song plays in Spotify (unlocking first if needed). After 10 minutes the music is paused and the check-in rings. → also here music should play if the screen is unlocked
  - **Quiz:** tap one of the answers A, B or C.
  - **Riddle:** tap “Show answer”.
- **After a quiz answer or a riddle answer:**
  - The voice says whether you were right and adds a fun fact (quiz), or says the solution (riddle).
  - It then asks “Are you awake?” and shows a pop-up.
  - **Yes**: done, with no check-in.
  - **No**, or no tap within 10 seconds of the voice finishing: works exactly like Play some songs. → also here music should play if the screen is unlocked
- **No reaction at all:** after the first reading plus **4 repeats** (about 3 minutes), the surprise closes and **the alarm rings again at full volume**, with Surprise me and Stop. This goes on until you react. And then the whole Surprise logic applies.

“Another one”

Draws a new surprise. A new song starts a new 10-minute timer, and anything else cancels a pending check-in. → Remove

4. Check-in “Still sleeping?”

- It **only comes after songs**: after a song surprise, Play some songs, or No / no answer in the pop-up, each time 10 minutes after the songs started.
- **What happens:**
  - Spotify is paused.
  - The alarm sound starts quietly and rings at **full volume** after 30 seconds.
  - The voice asks once: “Still sleeping? If not, tap here.”
- **Buttons** (in the app and on the lock-screen notification):
  - **I am awake**: done. No further check-ins.
  - **Play some songs**: songs play again, and 10 minutes later the check-in rings again. This repeats until you tap I am awake.

- **No tap:** the check-in keeps ringing at full volume.

5. Feedback

- **About 20 minutes after a surprise starts** (or after Stop without surprise), a notification asks: “Hey Jana, how did you wake up today?” plus a question that fits the surprise:
    - Song: “Did you enjoy the song?”
    - Mini challenge: “Are you up for the challenge?”
    - Quiz: “Did you like the quiz?”
    - Riddle: “Did you solve the riddle?”
- Tapping it opens a short pop-up: Great / Okay / Still tired, plus yes/no. The answers are saved only on the phone.

6. Known limits

- **Spotify can’t play over the lock screen,** so you have to unlock for music. → fix this
- **The Stop button** on the notification only stops the alarm, with no surprise, no check-in and no feedback.
- **On iPhone** the alarm only rings while the app is running in the background. The lock-screen features are Android only.
